Summary

Passionate MERN Stack Developer with hands-on experience in designing and building scalable, high-performance web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in creating intuitive user interfaces, RESTful APIs, and optimized backends, with a proven track record of reducing load times, improving efficiency, and delivering projects on time. Actively seeking full-time opportunities or internships where I can contribute, learn, and grow within a collaborative environment.

Experience

MERN Stack Developer, *Freelance MERN Stack Developer*   01/2025 – Present
                                                                                Remote
- Designed and deployed responsive, user-focused applications for clients across different industries.
- Implemented secure authentication, online payment integration (Stripe), and multi-currency support.
- Collaborated with stakeholders to refine requirements, delivering solutions that improved client operations by 20-30% efficiency.

Education

Bachelor of Science in Computer Engineering, *Lebanese International University*
GPA: 3.13

Technical Skills

Frontend
- React.js
- React Native
- Tailwind CSS
- Redux

Database
- MongoDB
- Mongoose

Backend
- Node.js
- Express.js

Other Tools
- Git
- REST APIs
- Agile Development
- Stripe Integration

Languages

English
Professional Proficiency

Arabic
Native

Interests

- Artificial Intelligence
- Cybersecurity

Courses

MERN Stack Development (Project-based)

React Native with Expo

Projects

Money Exchange App
- Built a full-stack platform for money exchange offices to manage client data, transactions, and multi-currency operations. Delivered a streamlined workflow, reducing manual errors and saving staff hours weekly.

Car Rental App
- Developed a scalable MERN application for booking and payments with Stripe integration. Enhanced user satisfaction by implementing a mobile-first, responsive UI.

Skill Hub
- Created a social media platform for talent showcasing, allowing users to share skills and experiences. Designed a component-based architecture, ensuring modularity and easy scaling.

Personal Portfolio
- Showcases professional projects, technical skills, and achievements. Link: my-portfolio-omega-five-49.vercel.app

Key Achievements

- Reduced application load time by 40%, boosting user engagement and retention.
- Developed 3+ full-stack applications from concept to deployment, including SaaS-style platforms.
- Improved delivery rate by 30% by applying Agile practices and streamlining collaboration.
- Optimized codebase efficiency by 25%, reducing maintenance overhead and downtime.

Certificates

Javascript algorithms and data structure (freecodecamp)

Scientific computing with python (freecodecamp)
