English (Fluent)

Arabic (Native)

Summary

Results-driven MERN Stack Developer with experience designing, developing, testing, and deploying scalable full-stack web applications using JavaScript, TypeScript-ready architectures, MongoDB, Express.js, React.js, Node.js, and RESTful APIs. Experienced with authentication, payment integration, responsive UI, Git workflows, Agile methodologies, performance optimization, and cloud deployment. Built 3+ production-ready applications, reduced load time by 40%, improved client operational efficiency by up to 30%, and optimized maintainability through reusable component architecture. Seeking Software Engineer or Full-Stack Engineer opportunities.

EXPERIENCE

Freelance MERN Stack Developer

Jan 2025 – Present

- Designed, developed, tested, and deployed scalable full-stack applications.
- Built secure authentication, Stripe payment processing, and multi-currency workflows.
- Optimized frontend performance, reducing page load times by 40%.
- Partnered with clients using Agile practices, improving business efficiency by 20–30%.

PROJECTS

- **Money Exchange Platform**
MERN application for transaction management, customer records, and multi-currency operations.
- **Car Rental Platform**
Booking system with Stripe payments, responsive UI, and REST APIs.
- **Skill Hub**
Social platform using reusable React components and scalable backend architecture.
- **Portfolio Website**
Showcases projects, technical expertise, and responsive design.
